PROFILE

Aspiring computer science researcher interested in applying machine learning techniques to real-world problems in healthcare and data science.

EDUCATION

Chinmaya Vishwa Vidyapeeth University, Kochi, Kerala
B.Tech Computer Science (Minor in AIML) | 2024 – 2028
CGPA: 9.5 (First Year), 9.26 (Sem 3)

SDV English Medium Higher Secondary School, Kerala - Class XII
SDV English Medium Higher Secondary School, Kerala -Class X

Relevant Coursework:

- Data Structures and Algorithms
- C Programming
- Java Programming
- Introduction to Artificial Intelligence and Machine Learning
- Database Management Systems (DBMS)

TECHNICAL SKILLS

- C Programming
- Java
- Python (currently learning)
- Data Structures and Algorithms
- Database Management Systems fundamentals
- Machine Learning basics

PROJECTS

Breast Cancer Detection using Machine Learning (In Progress)

Analysing diagnostic tumour features using the Breast Cancer Wisconsin Dataset.

- Performing exploratory data analysis (EDA) using Python libraries such as Pandas and NumPy.
- Developing a machine learning classification model to predict whether a tumour is malignant or benign.
- Studying data preprocessing, feature analysis, model training, and evaluation using Scikit-learn.

Fertilizer Recommendation System using Machine Learning (Team Project)

- Developed a machine learning model to recommend suitable fertilizers based on soil nutrients, crop type, and environmental conditions.
- Worked with a dataset of 1,980 records containing temperature, humidity, soil moisture, soil type, crop type, and nutrient levels (Nitrogen, Phosphorous, Potassium).
- Performed data preprocessing and feature encoding for categorical variables.
- Built and evaluated classification models to recommend the most appropriate fertilizer for improving crop productivity.

Tools: Python, Pandas, NumPy, Scikit-learn

RESEARCH INTEREST

- Machine Learning in Healthcare
 - Data Science and Predictive Analytics
 - AI-driven medical diagnosis systems
 - Web and App Development
-

ACADEMIC ACTIVITIES AND ACHIEVEMENTS

- Secured 3rd Prize at *Innopulse*, the college innovation competition organized by the Innovation and Entrepreneurship Development Cell (IEDC), for presenting an innovative project idea.
 - Participated in university SIH Hackathons, Ideathons, Idea pitching and Poster design competitions.
 - Secured 3rd Prize in an intercollege dance competition conducted at FISAT.
-

SOFT SKILLS

- Analytical thinking and problem solving
 - Curiosity and willingness to learn new technologies
 - Communication and teamwork
-

LANGUAGES

- English
 - Malayalam
 - Hindi
-
